Custom Rubber Hose Labels Manufacturer in China - FLLabels

Product Data Sheet

Description:

The rubber hose label is created before the curing process of the rubber hose, where the label pattern is printed using transfer ink on a release film. The release film is directly applied to the surface of the hose, and during the curing process, the ink transfers from the release film to the outer rubber layer of the hose. After curing, the release film can be peeled off, creating a permanent and highly durable label.

Specifications:

Thickness 20 - 100um , Width 8 - 40mm, Colors: Single-color / Double-color / Multi-color.

Application:

Our rubber transfer labels work on the following hose covers: SBR, Nitrile, PVC, EPDM, Natural rubber, UHMW, Butyl.

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies - particularly in foreign countries - with respect to third parties' rights.
